Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant elected figure 8 for examination in the previous response. Claim 7 is withdrawn from consideration since it is not directed to the elected species.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-6, 8, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scarpa et al (2003/0083149) in view of Helmstetter et al (6,506,125).

Claim 1, Scarpa discloses a club head comprising a body including a face and two masses on either side of the body and a connection between. The club head further discloses a compartment comprising an insert made from a material lighter than the body. The center of gravity is capable of being located within the insert since the masses vary. Scarpa does not disclose markings on the top of the club head. However, Helmstetter teaches marking for alignment purposes on the top of a club head (col. 4).

Claim 3, Helmstetter teaches the alignment means may be a strip. Claims 4 and 5, Scarpa discloses a rearward extension (fig 3). Claim 6, the width of the body is greater than the length. Claim 8, the rear of the compartment is extends upward (figs 2-3). Claim 9, the insert is made from titanium and the body is made from silver. One of

ordinary skill in the art would have modified Scarpa in view of Helmstetter to enhance the golfers play.

Allowable Subject Matter

Claims 2, 10, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
